

My Arizona Home Team's Monthly Home Improvement Tips

May 2009

Water Heaters

- Tip #1:** For gas water heaters, your local utility company may come out for initial hookup and inspection at no charge.
- Tip #2:** When vacationing in the summer, please remember to use the vacation setting on your water heater to save on utility costs.
- Tip #3:** Water heaters are ranked 3rd in the household energy consumption list, so slightly adjusting your temperature settings could make a large difference.
- Tip #5:** Long-term savings tip: Buy a new energy efficient water heater. While it may cost more initially, the energy savings will continue during the lifetime of the appliance.
