This week, I thought it would be useful to shine the light on how our condominiums are doing. Since we are among an ocean front region, condos are a hit for our area and as we roll into the summer months leaving spring behind, it's worth looking at how the market is doing.

8 Frequently Asked Questions

(Q) Why not use my friend who's a Realtor?

Think about what is important here. Do you want to sell your home or do your friend a favor? This is purely a business decision and should be based on performance and success.

(Q) How long is your listing agreement?

Our standard agreement is 6-12 months (with current market conditions, it may take 160-190 days to complete sale).

(Q) We are considering another company.

I welcome this and invite close comparison of my personal and company sales records as well as our exceptional customer service with any other firm.

(Q) "For Sale By Owner" Why not sell it myself?

Frankly, because I will net you more money. Statistics show properties sold through professionals have a median sales price 27% higher than FSBO sales.

(Q) Why not list high and come down if it becomes necessary?

Buyers in today's market may not even look at property that is overpriced. Listing at the right price for the market ensures the largest number of qualified buyers looking at your property~better to turn offers away than receive none at all.

8 Frequently Asked Questions Continued

(Q) Why did another agent say he could get us more money?

Remember, the people telling us what they will pay for a property is the Buyers, not the Agent. Some agents may be afraid to tell you the truth fearing they will not get your listing. I will base my suggestions on FACTS.

(Q) Exactly what are you going to do to sell our Home?

I am an active agent and will spend my time aggressively marketing your home to the public and other active agents. I have a comprehensive and complete marketing plan that has proven to successfully sell properties.

(Q) Why are some agents willing to do it for less?

That is a valid question, but could be a disadvantage when selling your property. Agents lacking in energy and innovation may be more passive in their sales approach and not as motivated to sell as we are. Your property must appeal to the public AND to other agents in the community~ a vital fact in selling your home.
